### Problem – Solution Fit Template:

Problem-Solution Fit Template is a structured format used in business, product development, or research to clearly define a problem and present a compelling solution that directly addresses it. It ensures you're solving a real, valuable problem for a specific audience. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

### Purpose:

- Sharpen your communication and marketing strategy with the right triggers and messaging.
- Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- Understand the existing situation in order to improve it for your target group.
- Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
